Ribbon Glads for 1950

First of all, I wish to thank my customers for their patronage and for their favorable comments in regard to the quality of stock received and service rendered. I shall be glad to know if at any time our service and quality do not warrant your utmost satisfaction.

All our stock is hand cleaned, graded and washed. We make a special effort to supply quality stock and a check with any of our customers will convince you that your order will receive prompt service and just treatment. They also know that any favorable changes in prices or discounts offered by reputable growers is taken care of by overcount and extras.

Dip and Spray

Dip the bulbs before planting in one tablespoon of Lysol mixed thoroughly with one gallon of water. Let them soak for 3 hours immediately preceding planting.

Spray your glads weekly after foliage is in the third leaf to kill thrips. Two ounces of tartar emetic, six ounces of brown sugar. Mix well with three gallons of water.

Discounts and Postage

On all retail orders our policy is and has been as noted below under Terms and Conditions. To our knowledge all customers have been more than satisfied. Since the current trend of most reputable cataloguers has been to a bonus listed discount, we are glad to let all old or new customers, who wish, choose their own extras on the following basis. This will in no way effect our liberal policies of the past. The discounts cannot be used in conjunction with any 1950 Introductions, wholesale prices or collections.

On orders of \$15.00 or less you can select 15% extra in bulbs of your own choosing. On all orders over \$15.00 select 20%. If postage is paid with the order you will certainly get your value in additional extras.

Terms and Conditions

Minimum order \$3.00. Orders are prepaid. Payment in full before delivery of order. Please do not use currency for payment by mail. Extra bulbs or overcount on all orders. My customers say this is more satisfactory than a complicated discount and certainly more interesting.

Illinois State Department of Agriculture inspected flowers and bulbs.

Every precaution has been taken to send out only healthy bulbs true to name but no guarantee of growth or responsibility of the crop is included in the sale. A refund of the purchase price will be made on any order found unsatisfactory upon receipt and promptly returned.

Purchasers should examine express shipments carefully so as to file claim if received in damaged condition. All orders sent by mail at my own risk.

Early orders are the best policy and please do not send any orders for bulblets after April 1, 1950.

Order accepted subject to stock, and subject to being filled in numerical sequence. This listing cancels all previously listed prices.

It is with great pleasure I submit to you the following list with my best wishes for your success and a good growing season for this year. Remember an early order helps you and gives me more time to put in extras and to make an extra count.

Recollections...

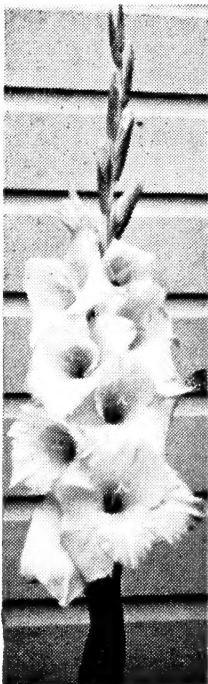

The following are my recollections of some of the newer varieties as they bloomed this season. This is not a recommendation of the best varieties or even an analysis of the new introductions. It is just a few personal observations that come to mind as I alphabetically checked the list. You are still the best judge of what performs best for your type of growing and climatic conditions.

Betty Duncan, a medium size orange that likes to grow. **Connie G** is most beautiful. **Cynthia** is better each year. **Evangeline** has the most robust growth of all varieties, most likely will become as popular as **Picardy**. **Falcon** is certainly a break in lavenders. **Freedom** can take care of itself and **Friendship** is a little sweetheart. A vigorous white is **Newport White**. **Pactolus** certainly can stack up the florets. **Red Cherry** and **Red Wing** do a good job in reds. **Temptation** looks like one of the best plain petaled purples. **Tivoli** made the grade and **Wedgewood** is a small beauty. Can we forget **Voodoo**? It still demands attention.

"Kelsey" (Yates-Ruehr '46)

The Air Express Glad

The florist, the commercial grower, and the fan's gladiolus. The beauty of this flower is best described as a glistening light salmon pink, blending to a clear cream yellow throat. Modern color qualities which give instant appeal and assure its position in the gladiolus family.

KELSEY

A healthy form sport of **Picardy** that grows tall and opens 7 to 9 giant 6-inch ruffled florets. When cut tightly in bud the florets will open to the tip. Grand Champion and Most Beautiful at Ottawa, Illinois, in 1945. Best Recent Introduction and Reserve Champion at Ottawa, Ontario, Canada, in 1946.

You will eventually grow **Kelsey** and **Silver Wings** like you are now growing **Leading Lady** in quantity. **Picardy** sports of quality.

Price each, Large, 30c; Medium, 3 for 50c; Small, 3 for 25c; Bulblets, 10 for 30c; 100 for \$2.00.

1950 Introductions

Aloha (Graff)

Aloha is a very beautiful gladiolus. It stands 55" in height. The flower head is about 24" long having a total of 18 buds. The stem is wiry, straight and strong. The balance is good, its facing erect. Its lasting qualities are excellent. It will open 6 florets.

The color of Aloha is that of a ripe apricot. The throat is lighter than the floret. It opens well when cut in color bud. Bulblets increase and germination is very good.

Any size bulb \$5.00 each.

One bulb and 10 select bulblets for \$10.00.

CLARENCE D.
FORTNAM

Clarence D. Fortnam (Kadel)

We believe and hope that this glad will prove to be a fitting memorial to the great showman for whom it is named.

"CLARENCE D. FORTNAM" is a glad with a statuesque beauty, blush pink in color. Its 5" florets, heavily ruffled and needlepoint, are borne on a 24" flowerhead with 8 of its 21 buds open and another 8 showing color. The champion spike at the 1949 Maryland show held 10 open on the second day. The height of the plant in the field is 56". It blooms in 90 days from bulbs taken directly from cold storage. If the bulbs are sprouted at planting time they will doubtlessly bloom a week to ten days earlier. Bulblet production and germination are excellent. Its heavy substance, tight attachment and ability to open when cut make it a promising cutflower. As an exhibition variety its show record speaks for itself.

1948: Voted "most beautiful" at Eastern International Show. Winner of American Home Achievement Medal at both the Keystone State and Maryland shows.

1949: Grand champion at Maryland show. Best spike in open division, and "most beautiful" at the Eastern International Show. "Most beautiful" at Lima Show.

If we are sold out of the size you order, may we substitute the nearest size in stock?

Any size bulb \$5.00 each.

Fairyland (Kadel)

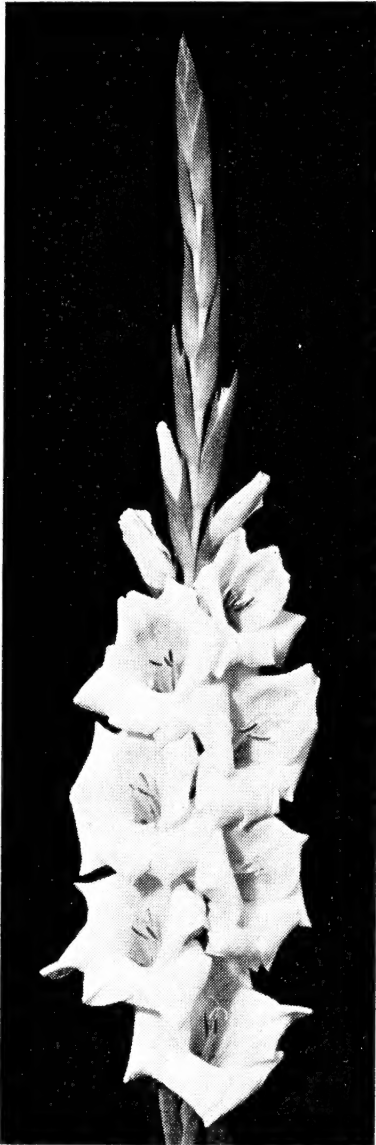

FAIRYLAND is a heavily ruffled glad of medium size. The color is a medium rose with an inconspicuous throat mark of a deeper shade. It is recommended chiefly for its decorative value. It opens six 4" flowers with six more showing color on a 15-16 bud spike. Height: 50". Flowerhead 22". Stem straight and long. Propagation is excellent. A basket of FAIRYLAND won the N.A.G.C. medal for champion basket at the 1949 Keystone State Show.

Any size bulb \$1.00 each. Bulblets 10 for \$1.00.

One large, three medium, five small and 25 bulblets for \$8.00.

1950 Introductions

Fashion (Graff)

The spike grows straight and to a height of fifty to fifty-five inches.

A long flower head with formal placement of florets has good balance and symmetry. The florets are nicely ruffled and also have plenty of substance.

Fashion is practically a self geranium pink with a deeper intensity on the lower lip, extending into the throat. Florets are firmly attached and the whole spike demands attention because of the appealing and fetching color.

"Pinky" was very satisfactory in our test garden this year and we believe you will agree with others who have seen it in bloom.

Any size bulb \$5.00 each.

One bulb and 10 bulblets \$10.00.

Formality (Kadel)

FORMALITY is a blush lavender in color with a cream throat. The 4" florets with recurved petals are close-set without crowding. This gives the spike a quite formal appearance, especially so when 8 to 10 florets are open at one time. The 24" flower head carries up to 22 buds. Because of its precise form and habits we believe it will be hard to beat on the show table in the 300-section. Propagation is excellent. Blooms in 88 days from cold storage.

1949 awards: Seedling rating "A" at Keystone and Delaware shows. Best 300-spike in open division at Delaware. American Home Achievement Medal at Eastern International Show at Binghamton.

The edge of the florets are frilled and it attains a height of fifty-five inches. The flower head is twenty-four to thirty inches having a total of twenty or more buds on a perfect balanced, wiry stem. The facing and placement is excellent. The texture is good as is its lasting quality. Good bulblet increase and good germination. Almost all of its bulblets will bloom.
